...

The carburetor on your Polaris ATV is used to bring fuel into the engine. If you are getting stalls or your engine will not turn over, you need to adjust the carburetor. Jet pins and an air adjustment valve are attached to the carburetor. This valve will allow you to reduce or increase the air flow to your engine. You ...

If the engine does not turn over, Polaris suggests three potential problems and solutions. First, there may be low battery voltage, and owners should try to recharge the battery to 12.8 VDC. Two other problems may be that there are loose connections on the battery or on the solenoid. In either case, owners should check and tighten all connections.
