Ford Fe Engine

The Ford FE engine is a Ford V8 engine used in vehicles sold in the North American market between 1958 and 1976. The FE was introduced to replace the short-lived (in the USA) Ford Y-block engine, which American cars and trucks were outgrowing. It was designed with room to be significantly expanded, and manufactured both as a top-oiler and side-oiler, and in displacements between 332 cu in (5.4 L) and 428 cu in (7.0 L).

Ford FE engine - Wikipedia

The FE Ford engine was released into production in 1958. The earliest applications included use in the short-lived Edsel program. The FE was not a replacement for the Y-block; it was a larger companion to an engine family sharing some design features. In 1958, the Y-block was still considered a current design at only four years old.
