# File Type PDF Properties Of Solutions Answer

Solutions. In all solutions, whether gaseous, liquid, or solid, the substance present in the greatest amount is the solvent, and the substance or substances present in lesser amounts are the solute (s). The solute does not have to be in the same physical state as the solvent, but the physical state of the solvent usually determines the state of the solution.

the temperature to 35°C, or add 25 g more solute. 36. Of the two points on the line, point F must represent the point of saturation because the solution became saturated and the temperature increased from the exothermic solution process. 37. As the temperature increases, the solubility of SO<sub>2</sub> decreases.
